Better Protection through Science and Technology

3M has taken the simple concept of surface protection and revolutionised it to enhance your painting process. Not only is the 3M™ Dirt Trap Protection System great for surface protection, but a closer look reveals a breakthrough innovation that actually traps dust, dirt and overspray in a unique non-woven construction.

Adhesive-backed, non-woven material.

Buildup of trapped dust, dirt and overspray.

YOU AND 3M – EXPERTS EVERY STEP OF THE WAY

3M™ Dirt Trap Protection System

3M™ Dirt Trap Protection Material

A specially engineered adhesive-backed white material designed to:

- ▶ Protect paint booth walls and floors
- ▶ Trap dust, dirt and overspray
- ▶ Brighten work areas

3M™ Dirt Trap Protection Film

Adhesive-backed clear film protects lights and windows from overspray buildup

- ▶ No more scraping and cleaning... simply peel off and re-apply

Put more work through your paint department

Increase paint booth productivity

Increase paint booth utilisation by reducing daily and periodic maintenance.

Save finishing time and increase customer satisfaction

When airborne contaminants settle on your freshly painted surfaces, it creates an extra step to prepare the finish to meet your customer's expectations.

This additional time could be spent on another job and improve your throughput.

Protect Your Investment

Your paint booth is one of the largest investments in your shop. Keeping this asset in top working condition is a never-ending task. Cleaning, scraping, re-painting takes away from valuable production time. Repeated washing introduces moisture, which promotes premature rust and

corrosion. The 3M™ Dirt Trap Protection System minimises booth down time and helps keep this valuable piece of equipment in top working condition.

Great for waterborne paint systems

Waterborne paint systems require more airflow to accelerate dry time. This increased airflow could mean more airborne dust and dirt.

Dirt Trap Protection Material helps trap these airborne contaminants and keep them away from your paint job.

Trap the dirt and help reduce your compounding and polishing times.

Can also be utilised in paint mixing rooms and on floors adjacent to the booth to further reduce contaminants.

Brighter painting environment

Paint Booth BEFORE

Paint Booth AFTER

How to get started:

- 1** Clean and Prepare Booth. Remove loose dirt and overspray.
- 2** Install 3M™ Dirt Trap Protection Material on walls from bottom up.
- 3** Install 3M Dirt Trap Protection Material on any solid booth floor areas.
- 4** Install 3M™ Dirt Trap Protection Film on windows and lights.

Traps dirt. Protects profits.
